## CHLORINE GENERATOR

## CHLORINE GENERATOR

### Which Ei?

Consult the chart below to see which Ei model is right for your pool.

Zodiac TRi chlorinators are recommended for larger pools and for those pool owners seeking more features including upgradable parts with pH balancing and chlorine production control. TRi is designed to handle larger pools. Talk to your pool professional about which product is right for your needs.

### Specifications

Plumbing Capacity	40 or 50mm
Minimum salt level	4000ppm
Power pack dimensions	330H x 245W x 110D
Cell dimensions	275H x 165W x 125D
2 Year Warranty	Power pack and cell

### Complete Control

Ei and TRi can be connected to the Jandy Aqualink controller system for total pool automation.

### Dimensions

Renowned worldwide for the quality and reliability of its products in the aeronautical and marine sectors, Zodiac has now brought its expertise to swimming pools, to bring you a full range of pools, automatic pool cleaners, water treatment systems, heating systems and dehumidification units for swimming pools. Backed by Clearwater technology, expertise and experience, Zodiac brings you the reassurance of top quality equipment in terms of both design and performance. A real guarantee of efficiency and peace of mind!

## Salt chlorination made easy!

The Ei is the latest product innovation from Zodiac, the world's leading brand of salt chlorinator. The Zodiac Ei has been designed with one goal in mind: to make chlorinating domestic swimming pools as easy as possible. From installation and set-up, right through to operation and maintenance, the Zodiac Ei makes salt chlorination easy. It is ideal for those pool owners looking to trade-up from manual chlorine dosing or basic single polarity (non self cleaning) chlorinators.

Step 1

Step 2

Step 3

The patented new design makes installation a breeze. Just drill a couple of holes and drive in a couple of screws.

The compact design and patented 'quick fit' clamping system mean that the Ei can turn your current manual chlorine pool into a safe, healthy saltwater pool on almost any filtration system. If you already have a salt pool and are looking to replace your tired old chlorinator, the Zodiac Ei will easily fit onto your existing plumbing. You don't even need to take the old cell off. Just disconnect the power to the old unit, install the Ei unit alongside the old cell, plug it in and you are ready to go.

A simple, intuitive menu control makes operation easy as well. Simply set the clock and timers, add salt and you're done. Within 15 minutes you will have your new Ei up and running, all that's left to do is dive in. With just the touch of a button you can increase the chlorine output depending on how many people are in the pool or any other factors such as heat/rain etc. The control panel features warning indicators should any issues arise.

The Ei cell is equipped with true reverse polarity electrode plates. This means that any ongoing maintenance is kept to an absolute minimum as the unit performs a self cleaning cycle every few hours.

## How does Ei work?

- 1 Patented feeder tubes force saltwater into the electrode 'bell' where the chemical reaction of the electrolysis turns it to 100% usable chlorine gas, no waste.
- 2 A clever spacer bar means the Ei can be fitted to either 40mm or 50mm pipe.
- 3 The high density seal in conjunction with the ring clamp ensures that there is no leaking.
- 4 The transparent electrode 'bell' gives a clear view of the electrolysis plates so you can keep an eye on chlorine production and any required maintenance.
- 5 High quality reverse polarity electrolysis plates designed to give you season after season of hassle free chlorine production.

→ Unchlorinated pool water  
 → Chlorinated water after exposure to plates  
 → Gas removal, via extraction tube
