

EXACT MICRO 10

ADVANCED PHOTOMETER SYSTEM

***THE FIRST METER TO READ
COMBINED CHLORINE DIRECTLY
WITH 0.01 PRECISION (NO MATH)!***

The eXact® Micro 10 is EPA-compliant for Free and Total Chlorine regulatory testing.

It's ideal for residential, commercial, and municipal testing. With a 4 mL sample cell its environmental friendly using fewer chemicals than the ordinary 10 ml test. The meter provides accuracy you can rely on, minimum variation, and fast results (uses 20 second test method) at 0.01 resolution.

The eXact Micro 10 photometer, tests for up to 40 water parameters using test strips. No colour matching is required to determine water quality levels and most testing is done with exact results in under a minute.

The meter directly reads: Free, Total and Combined Chlorine, Bromine, pH, Total Alkalinity, Calcium Hardness, Cyanuric Acid, Salt (Chloride), Phosphate and Transmission Mode. In transmission mode the meter reads additional parameters with the use of a conversion table including Manganese, Iron, Nitrate and Hydrogen Peroxide

- Over 10 direct read parameters
- First meter to directly read Combined Chlorine with 0.01 precision and no math required
- Built-in, permanent cell (simply fill or dip into water)
- Automatic countdown timer
- 160 test memory (saves last 20 tests per menu)
- Incorporates eXact® Strip technology (safe & reliable reagent dispersion)
- Non-slip grip housing
- Lightweight (weighs only 850 grams with batteries installed)
- Waterproof meter (IP-67) & floats
- No colour matching
- No test tubes to break
- Uses standard batteries

How it Work

Fill the cell with the water sample

Dip the exact Strips into the cell moving it in a gentle back a forth motion for 20 second

Read the result. It's automatically store in memory. Just rinse the cell and ready for next the parameter.

Direct Read specification

Menu	Tests for	Range
AL1	Total Alkalinity	12 - 180 ppm
PH2	pH	6.2 - 8.4
CL3	Free, Combined & Total Chlorine DPD-1) & (DPD-3)	0.00 - 11.0 ppm
CL3	Bromine (DPD-1)¹	0.00 - 28 ppm
PO4	Phosphate	0.0 - 4.0 ppm
CA5	Calcium Hardness as CaCO3	10 - 500 ppm
CH6	Salt / Chloride as NaCl	40 - 7000 ppm
CY7	Cyanuric Acid	0 - 110 ppm
TR8	Transmission²	99.9 - 0.01 %T

- 1 Bromine is read in CL3 Menu and requires a multiplication factor of 2.6
- 2 Measurement requires a conversion chart value
